

Lightbox Code Placement Example

Below is an example HTML page. This example shows where the provided code needs placed when using a lightbox. The actual HEAD section of your webpage will more than likely look different than this example and will probably include many more items in it. This is a very basic example.

<head>

<title>Your Website Name</title>

Insert provided code from your affiliate control panel here.

</head>

<body>

Insert provided code from your affiliate control panel here.

</body>

The red text above is found in this box:

```
Paste this code into the HEAD section of your HTML document.
<link rel="stylesheet"
href="http://www.          lightboxes/source/css/lightbox.c
ss" type="text/css" />
You only need to place this code one time no matter how many light boxes you place on the page.
```

The purple text above is found in this box:

```
Click the above image to view the lightbox.
Paste this code into the BODY section of your HTML document where you want the image to appear.
<a href="http://www.          lightboxes/screen2.png"
width="308" height="249" title="Click here to visit our
website!" rev="http://www.          idevaffiliate.php?
```
